(54) Title: LATCH ASSEMBLY WITH DEAD LATCH INDICATOR

(57) Abstract: This application relates to a latch assembly (1) having a first actuator (7) operable from an inner side of the assembly (1) and a second actuator (8) being a key operable actuator operable from the outer side of the assembly. The operation of the first actuator (7) being controlled by a key operated lock (14). The assembly (1) including an indicator means (73) associated with the first actuator (7). The indicator means indicating whether the first actuator (7) is in an operable condition or an inoperable condition.
